

The WHY behind the conference:

All children have gifts, abilities and challenges. We want all who teach and care for our Primary children to have the tools they need to be confident in helping each child feel God's love for them while learning gospel principles. If applied consistently, the teaching methods that will be taught on March 16th will help behaviors and improve learning.

It is our prayer that parents and teachers will be encouraged to work together to reinforce these teaching techniques and methods. Consistency in applying these methods at home and at church will help every child feel more comfortable and confident so they can relax and feel God's love, and the joy that comes from improvement and growth.
